

Keeping Up to Date: Google alerts

As well as keeping up to date with journal literature on your area of interest, have a regular search of the web can be very useful. Google Alerts can help.

Go to <http://www.google.co.uk>, and click "more" and "even more"

- Scroll down till you find "specialised search", and pick "alerts"

(Alternatively type: <http://www.google.co.uk/alerts> into the URL bar)

Monitor the Web for interesting new content

Google Alerts are email updates of the latest relevant Google results (web, news, etc.), based on your queries.

Enter a search query that you wish to monitor. You will see a preview of the type of results you'll receive. Some handy uses of Google Alerts include:

- monitoring a developing news story
- keeping current on a competitor or industry
- getting the latest on a celebrity or event
- keeping tabs on your favourite sports teams

- Type your search words in, and chose the options that suit you best - it's that easy!
- You'll receive an email from Google to verify that you wish to set the alert up.
- To manage your alerts - delete or modify - you must login with the Google account that matches the email address that you've used to set up your alerts.
